

WALK YOURSELF WELL WITH FREEWORLD AUSTRALIA

*“When you walk, you are massaging and honouring the earth. In the same way, the earth is trying to help you to balance your organism and mind” –
Nhat Hanh*

Get ready to step out in style with Freeworld Australia’s revolutionary footwear.

Amidst the chaos of the pandemic, the one constant we could rely on was the solace and rejuvenation offered by walking or exercising outside. Whether a quick stroll around the block or a leisurely hike through the hills, walking gave people of all ages and levels a much-needed break from the monotony of lockdown life. As a brand founded from a love of walking (and coffee!), we were inspired to soldier on through the pandemic and design the ultimate footwear range to suit ALL walks of life.

Innovative by design and supportive by nature, Freeworld's collection has been carefully crafted to reduce foot fatigue and boost walking recovery. Our **Walking**, **Comfort** and **Recovery** ranges enable you to fully immerse yourself in the walking experience, letting your mind wander or refresh as you reconnect with yourself and your environment.

The Freeworld Trifecta

Walking

Designed to minimise wear and tear on your feet, The Baywalker range incorporates our innovative Elanothene+C™ midsole for superior impact absorption, allowing you to walk the distance. But that's not all! We discovered that we could boost the durability, elasticity, and sustainability of the shoe by adding old, discarded coffee grinds to the EVA manufacturing process. Coffee and walking go hand in hand and as sure as we will never give up walking – we would never dream of giving up coffee! And so here we are, as one, with coffee literally embedded in our 'sole'.

Comfort

Created for people on the go, the Comfort range features our therapeutic Elanothene™ and high-density EVA midsole for elite cushioning and durability, odour-resistant materials, and excellent arch support – it'll truly feel as if you're

walking on sunshine! As we continue to improve each product component, our latest designs are our most eco-friendly yet, using recycled textures and sustainable materials such as old coffee and tire waste powder. Available in a variety of options, colours, and materials, we've ensured that everyone can experience the Freeworld Comfort.

Recovery

Crafted from skin-soft Elanothene™, our ultra-soft yet ultra-supportive Recovery sandals provide superior structure, shock absorption and comfort. With an anatomically designed massage footbed and trademark rocking stride, these sandals will restore and revive your feet after a long day at work, the gym or anywhere else! Our Recovery sandals come in nine fashionable colourways to suit any outfit or mood and are available in both Thong, Slide and Strap styles.

One Step at a Time

At Freeworld, we are proud to push the boundaries of what is possible in footwear design. Our teams in Brisbane, Sydney and Korea continually explore and test cutting-edge materials and technologies to better our brand, with a strong focus on honest sustainability, innovation, and comfort. However, just like walking, we get that we don't have to be the best – just *good enough*. This mindset keeps us grounded as we expand our horizons and take slow and steady steps towards a greener world.
