- [24] Gear loops on the front
- [25] Large front opening
- [26] Voluminous zippered front pocket
- [27] First Aid Compartment (Contents not included)
- [28] PFC/PFAS-free DWR finish

Tatonkas trekking classic for women with proven women's carrying system and optimized features. The slim women's trekking backpack Yukon Women is designed for loads of up to 25 kilograms. Its lightweight and stable V2 Women Carrying System can be optimally adjusted to the length of your back, while the hip belt with its three-dimensionally shaped hip fins hugs the pelvis perfectly and offers very efficient load transfer. For the 2025 season, we have enhanced the features of the backpack: the lid compartment can be removed and either attached to the front of the shoulder straps as a front pocket or used separately as a shoulder bag. In addition, the backpack now has a large, voluminous front pocket that makes it quick and easy to stow a jacket, for example. The base of the backpack is made from robust CORDURA® and reinforced on the inside with a second layer of fabric. The cut of the pack prevents water from penetrating this important area thanks to the raised bottom seam at the side. Available in sizes 50+10 liters and 60+10 liters. The backpack has a PFC/PFAS-free DWR finish.
