

CATALOG 2024

**AFFORDABLE
HIGH QUALITY
LIGHTWEIGHT**

**Our goal is to offer
lightweight, high quality,
affordable equipment for the
pursuit of outdoor endeavors.**

Since 2002, we have been innovators in the outdoor industry and have always believed that gear should aid in one's experience - not define it. We strive to offer our products at a price reasonable for everyone. Our belief is that the more time people spend exploring nature, the better off this world will be.

We stand behind our products 100%

***Go wild,
Live Young!***

**REDUCE
REUSE
RECYCLE
REPAIR**

Commitment to Sustainability

Since our humble beginning, we have held sustainability as one of the key tenants when producing gear. That is why we have always strived to use long-lasting material, minimal packaging, and encourage our customers to properly care for their gear and send it in for a repair instead of a replacement.

Six Moon Designs is committed to continuing to improve our sustainability by:

- **Utilizing recycled material where we can and/or materials that meet the Bluesign® criteria**
- **Reducing the amount of plastic used in packaging, with the goal of completely phasing out single-use plastic by 2030**
- **Our headquarters are powered by 100% renewable energy through the PGE Green Future Choice Renewable Power Program.**
- **Eliminating all PFAS chemicals from our product line by 2025**
- **Utilizing silicone-coated fabrics for our shelter line. This is not only PFAS-free, but also greatly extends the lifetime of our shelters, by eliminating delamination of the waterproofing found in PU-coated materials**

Dear Dealers,

It gives me immense pleasure to share with you our new 2024 catalog. Our team has been working hard the past few years to help provide more clarity to our product line and provide you with the resources to better help our customers. I couldn't be more proud of the work they have done and I especially think that the new pack fitting guide on pages 10-11 will be a tremendous help going forward for you and your staff.

2023 had its challenges for all businesses from the US, Europe, and Asia as we settled into our new post-pandemic market. I think we as partners did a great job of working together to navigate things and be successful despite the conditions. As we move forward in 2024, I am more excited than ever about the prospect of opening new market sectors for our brand as we expand into the world of travel with the new Adventure Trekking line.

The Adventure Trekking line is a great addition to the legacy of Six Moon Designs and will provide a broader

customer base to learn about us, our history of making great gear, and more so how we help make people's dreams of exploration a reality. We have spent a lot of time developing the line and testing it for years, and in the last 8 months, I have personally used the items to visit 4 countries on 3 different continents and provide valuable feedback for the final design.

The core of our brand has always been providing users with lightweight, affordable, and high-quality gear. We are sticking with this as we continue to develop new shelters, backpacks, and accessories for our core ultra-light outdoor line of hiking gear. Later this year we will be releasing a new tent into the market, and it is sure to become a favorite among hikers, bikers, and those hardy soles who push the limits of human endurance.

The team is also working on new designs in our shelter line to provide a wider season of use on certain models, new backpacks to help expand our line with some load haulers for those extended expeditions or those new to the ultralight world, and expanding our line of bags for everyday use. The future has never been brighter for our brand and I couldn't be more excited to continue to share with you all new products as they come to market.

I look forward to working with you this year and into the future.

Thank you,
**Whitney "Allgood"
La Ruffa
VP of Sales &
Marketing**

Company Origin

If the solution doesn't exist, make it yourself!

Ever since my first high school adventure on the Appalachian Trail, I've been hooked on backpacking.

A few years later, in the summer of 1977, my wife, Linda and I took off to hike the Appalachian Trail (AT). We were one of the first couples to hike the entire trail southbound. Following our AT hike, we moved from Virginia to Oregon. As impoverished college students, we learned to sew much of the equipment needed for our backcountry forays.

In 2000, I worked to reduce my pack weight for a hike of the Pacific Crest Trail. I made much of my own gear, this time not because I couldn't afford it, but because what I wanted simply didn't exist. Through this experience, I realized there was a need for affordable, ultralight weight gear in the market.

That's when the idea of Six Moon Designs was born.

- Ron 'Fallingwater' Moak

Ron with his custom pack on the PCT, 2000

A (younger) Ron carry a bit more gear 1977

Ron in a Europa Tent, circa 2002, the first tent sold by Six Moon Designs

Evolution of a Concept

In May of 2002, Six Moon Designs introduced their first product, the Europa Tent. Since then we have designed and introduced a variety of innovative products from the Starlite Pack to the Gatewood Cape.

Today we are still a leader in the lightweight market with our extensive line of packs, our family of shelters and our emerging travel line. We continue to carry forth our philosophy of light weight, high-quality, and affordable equipment.

Six Moon Designs Today

SMD's product line has expanded tremendously since the early days. We make shelters, umbrellas, packs, travel packs and a wide array hiking related accessories.

Despite the growth, every product align with Ron's original philosophy

PACKS

We design all of our ultralight backpacks with the mindset that whatever you put in your pack should ride comfortably on your back all day long.

Our collection of packs has something for everyone. From our Fast and Light series for fast-packing and thru-hiking to our Fusion series which are the load hauler packs for those times when you need a little extra support.

We didn't stop at just ultralight thru-hiking packs. We also make a daypack for your short jaunts in the mountains and designed our Flex PR pack for portaging or pack Rafting.

Check out our "Ultimate Guide to Ultralight Packs"

Pack Materials

We strive to use the most cutting edge fabrics paired with the best hardware available.

Our pack collection represents experience taken from tens of thousands of miles on the trail where we figured out what worked to keep you comfortable while pushing miles and making memories.

Dimensions Polyant X-Pac™ VX21 A workhorse material

Its constructed of three layers; a 210 denier nylon face (hence the 21 in VX21), a black polyester X-Ply™ grid on a PET film, and a 50 denier taffeta backing. The outer 210 denier face is then treated with a durable water repellent finish. Collectively these layers create a very technical fabric with exceptional abrasion resistance, low stretch, and durable waterproofness. LiteSkin™ is very similar to X-Pac™. It is an ultralight waterproof pack material, designed specifically for abrasion resistance at the lightest weight possible.

Challenge Sailcloth UltraStretch a Lorem Ipsum fabric.

Advanced Stretch Mesh - Supercharged with ULTRA™. Lightweight, durable, and tear-resistant UltraStretch™ is a 4-way stretch mesh woven with The highest quality fibers for performance and longevity Ultra-High-Molecular-Weight Polyethylene Ultra™ Fiber, aka UHMWPE gram-for-gram, has a tensile strength 15x stronger than steel. ULTRA™ fiber is incredibly lightweight, cut & abrasion-resistant. Ultra Stretch™ features a versatile aesthetic with both a dark and light side. Perfect for stretchy pockets on ultralight bags and backpacks

Dimensions Polyant LiteSkin® LS21 A laminate fabric.

Comprised of a layer of Non-Woven Polyester face coated with Poly Resin with a 210 denier Nylon DWR ripstop backing Utilizes the same 210d nylon face as our most popular VX21, but is applied to the back-side of the laminate. The result is a highly abrasion-resistant face-fabric, with similar stitch-holding properties as VX21.

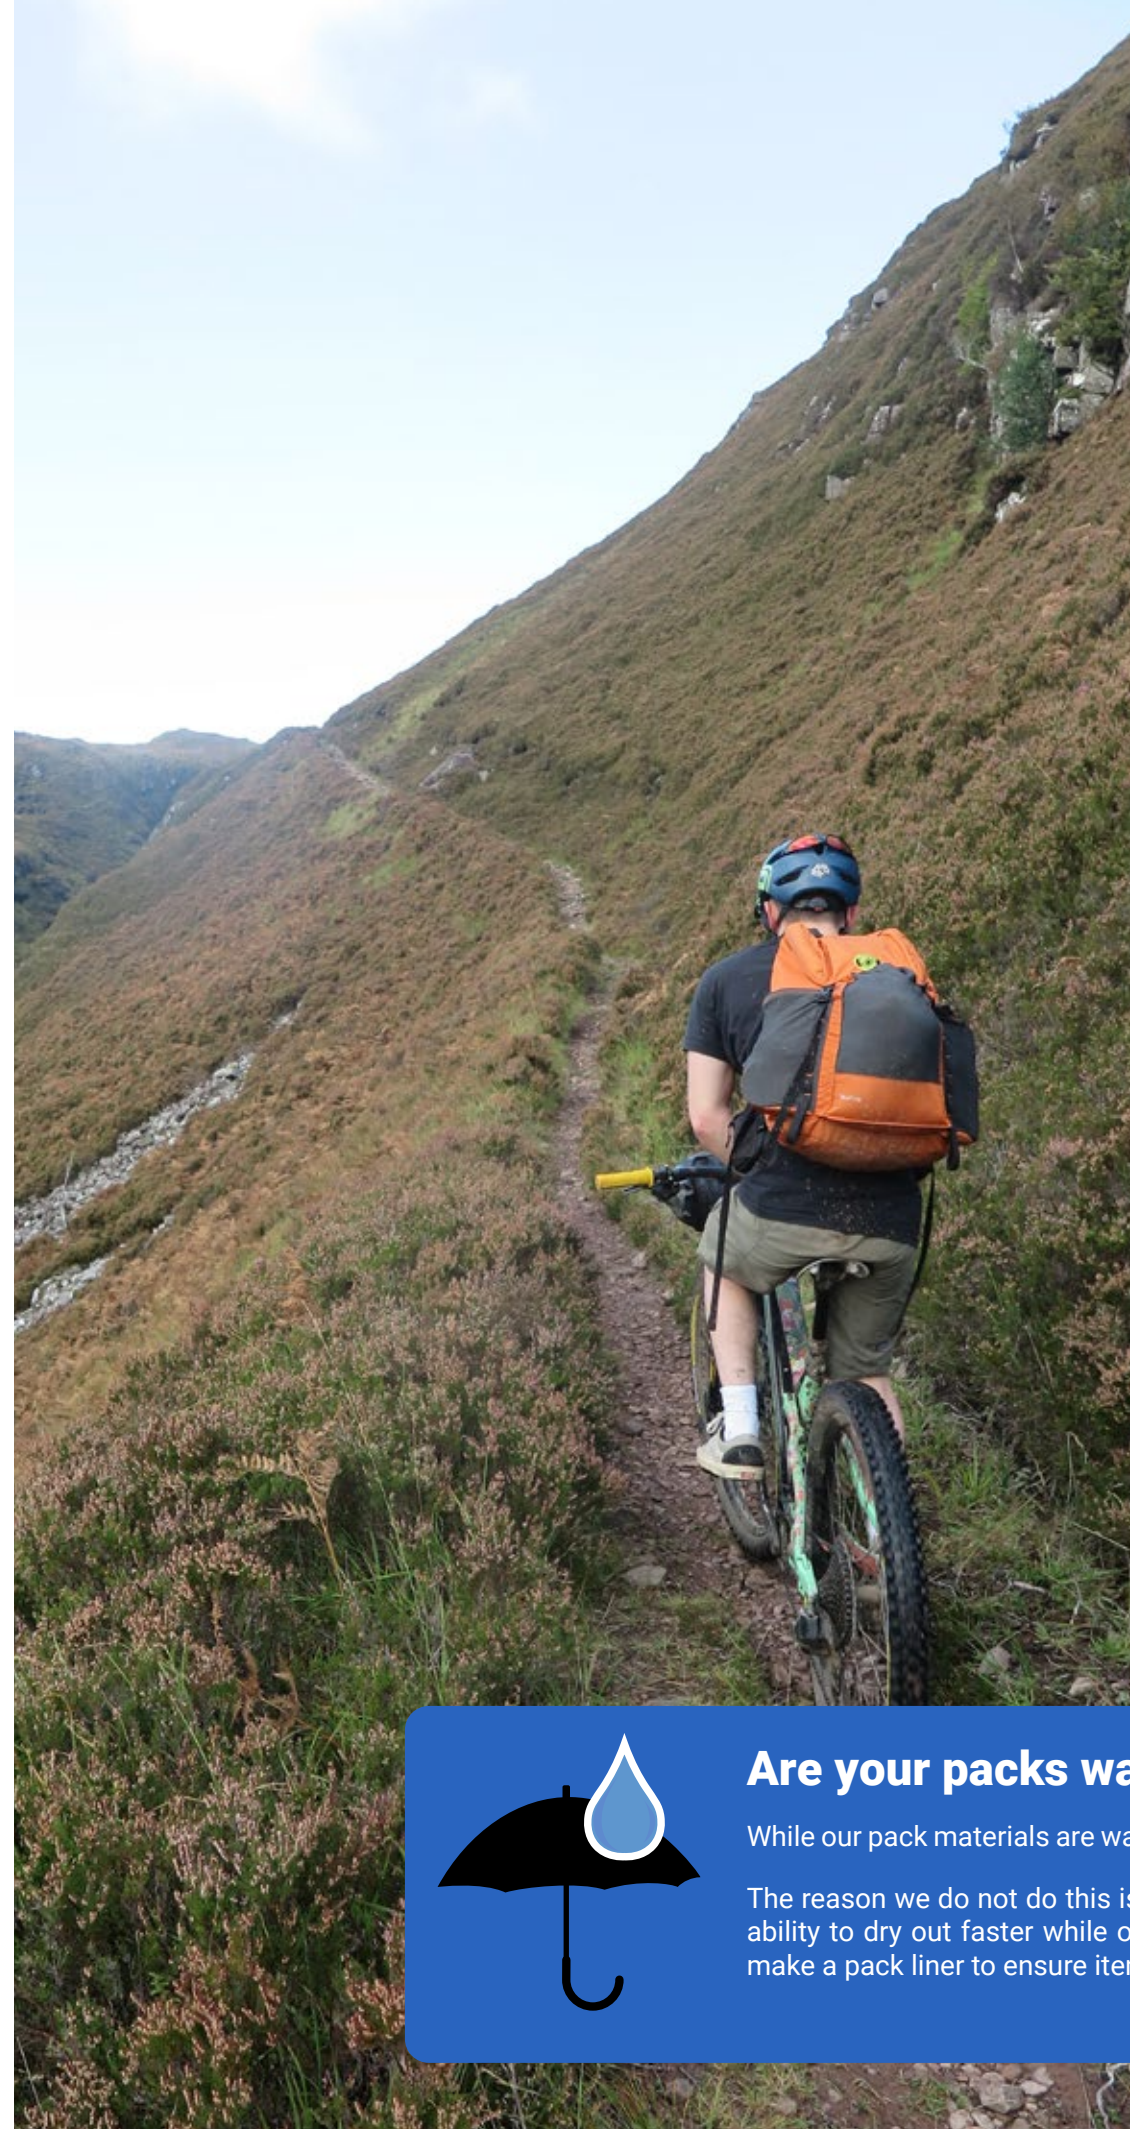

Challenge Sailcloth EPX200 a Lorem Ipsum fabric.

100% recycled polyester components, CO DWR (no fluorocarbons), 70d Ripstop backing, recyclable after use. Compared to traditional pack fabric with 50d plain weave backing, the 70d Ripstop has better stitch holding and superior strength. Designed for a small pack or accessory, or a soft-hand liner. For use as a face fabric in an ultralight pack, a heavier bottom panel is recommended for improved abrasion resistance.

100 Denier ROBIC Nylon™ A basic square grid ripstop

Combined with a super strong, high-tenacity ROBIC® Nylon base. The backside features a unique UTS (Ultra Tear Strength) Coating that is specially formulated to increase tear strength while offering excellent hydrolysis performance. The biggest benefit to the hydrolysis coating is that if the material does wet out, it dries exceptionally fast compared to other materials we have tested.

Suspension Systems

Flight System Fast and Light

The Fast and Light Suspension System solved a problem that's common among many light-weight packs.

The problem is how to incorporate a lightweight support system that does not terminate at the corners of the pack which can create an inefficient transfer of weight. The light bulb shape of our stay solves this issue by arching through the main body of the pack and terminating at the lower lumbar for a design that efficiently transfers the load evenly.

Fusion System Heavy or Bulky Loads

Developed through multiple years of designing, testing, and revising.

Designed to connect the shoulder harness and hip belt directly to the spine of the pack for optimum load transfer and carrying comfort. Our packs that use the Fusion Spine System are the load haulers of our pack line-up and are as comfortable on a weekend overnight as they are on a multi-month Expedition.

Are your packs waterproof?

While our pack materials are waterproof, we do not tape or seal our pack seams.

The reason we do not do this is because we found that gear needs to have the ability to dry out faster while on multi-month expeditions. This is also why we make a pack liner to ensure items like electronics and down stay dry!

Component System

Modularity for greater comfort

The modular design of Six Moon Designs Backpacks allow for the interchanging of different components to fit different needs and sizes. Our components will work on every pack we make and have unique features to meet each user's needs.

Flight Hip Belt

A lightweight and breathable hip belt made for the long haul

Standard Hip Belt

Made for heavier loads, this hip belt features additional padding and structure.

Flight Shoulder Harness

A traditional backpack shoulder harness sewn in ultra stretch pockets.

S-Curve Flight Shoulder Harness

A shaped shoulder harness to accommodate those who want more comfort in the chest area.

Flight Vest Harness

A running style vest harness with ample pockets and efficient load distribution.

Sizing Guide

Measure twice, cut once

If you find that you are between size measurements, we recommend going with the smaller size so that you have room for adjusting the hip belt with out zeroing out the padded section. If you are still unsure, please contact us by emailing store@sixmoondesigns.com. Please include your overall height, torso length, and weight.

Pack Fitting Instructions

Sometimes a one-size-fits-most approach is OK. But when it comes to having backpack where All-Day-Comfort is critical, you need a pack that perfectly fits your body. That Perfect Fit comes from having accurately sized components. Our modular system offers different types of shoulder and hip suspension, all in various size.

Whatever your body type and size; we have a combination that you'll be sure to love. Every pack accommodates each individual differently. With the Six Moon Designs system, you can adjust the pack to suit YOUR body. Achieving the perfect fit begins with establishing a solid baseline. Follow these directions to get started

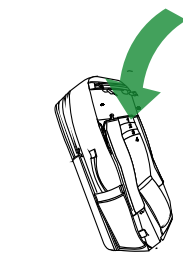

After Initial Adjustment

- Test fit the pack with weight
- If the pack is not distributing weight to your hips, try moving to a different Torso Length Slot

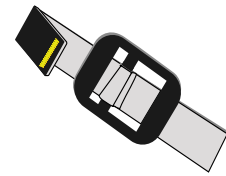

General Tips

- When moving shoulder length slots or sternum strap locations, loosen all straps and restart the process
- Don't overtightened the sternum straps.
- Pack adjustment is an ongoing process throughout your hike, don't be afraid to make micro adjustment throughout the day.

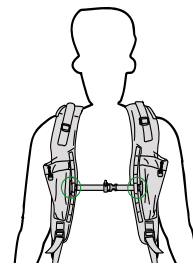

Shoulder Harness S-Curve Harness

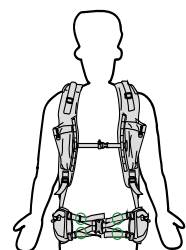

1. Insert Shoulder Straps into slot 1,2,3, or 4 based on your torso length

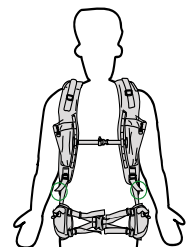

2. Ensure none of the components are under tension or warped before starting the adjustment process

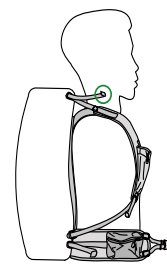

3. Center Sternum Strap to Middle Of Chest or to comfort

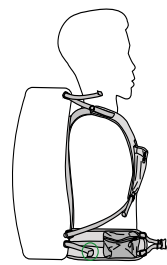

Center Hipbelt on hip- bones and tighten 4x loops tighten middle straps until snug

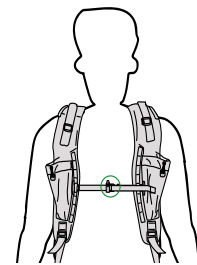

Pull Down on top Shoulder Adjuster Straps till snug

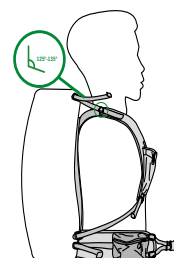

Pull Down on Load Lifters till snug

Tighten Hipbelt Load Lifter

Tighten Sternum Straps

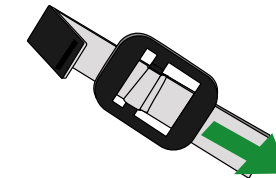

Adjust both Load Sliders to increase angle from Lift Lifters

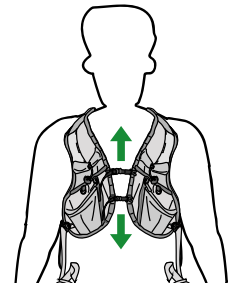

Vest Harness instructions

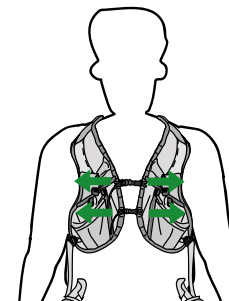

1. Insert Shoulder Straps into slot 1,2,3, or 4 based on your torso length

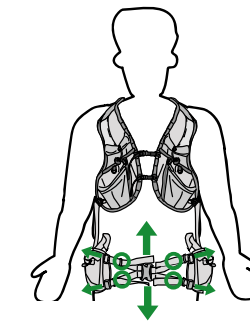

2. Ensure none of the components are under tension or warped before starting the adjustment process

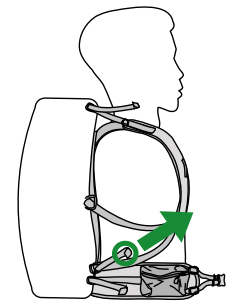

4. Center 4x Sternum Strap to Middle Of Chest or to comfort

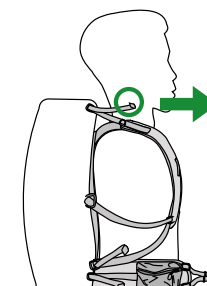

4. Tighten Vest Sternum straps until snug

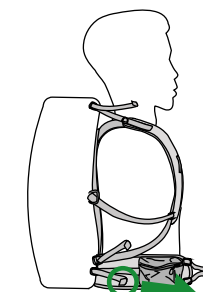

5. Center Hipbelt on hip- bones and tighten 4x loops tighten middle straps until snug

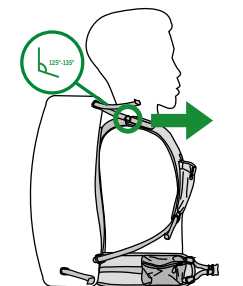

6. Tighten Lower Side Tension Straps Lifter

7. Pull Down on Load Lifters till snug

8. Tighten Hipbelt Load Lifter

9. Adjust both Load Sliders to increase angle from Lift Lifters

Jim Sutherland

Swift X 36 oz - 1021 g

A modern take on a time-tested design.

It's been over ten years since we first designed the Swift. Since then we've added modern upgrades to create the Swift X.

Constructed from lightweight, durable fabric. This ultralight backpack's simple, modular design means it can be easily configurable to become your perfect pack for any adventure, be it a quick overnight trip or a calendar year triple crown.

Swift V 38.8oz - 1100g

The budget alternative to Swift X

Modeled after the Swift X, the Swift V uses the same design but is constructed out of the more cost-effective Robic™ nylon fabric.

The Swift V still has all the features and benefits so many hikers love in the Swift X. It provides ultimate functionality in a simple design. It has a single 41L roll-top main compartment with a 10L extension collar for those resupply days. A Y-strap secures the load top and provides a convenient and easy attachment point for a bear barrel.

Minimalist V2 35 oz - 1002 g

Redesigned to make simple even more functional.

We took the simple, clean design of the Minimalist, and using customer feedback, made it even better.

The Minimalist V2 still has the perfect amount of space for all your gear. Its lightweight suspension system adds just enough support and not more than you need. At customer request, we've upgraded the stash pocket to be larger and more secure. Even the lettering takes a more subtle minimalist look.

Thanks for the help making the thru-hiker dream backpack even better.

Shelters

Six Moon Designs makes a variety of ultralight backpacking tents and tarps that have proven themselves time and time again in some of the harshest conditions. Our collection of ultralight tents range from single-wall 1-2 person tents to our ever popular double-wall options: the Deschutes, Gatewood Cape, and Haven bundles.

We are sure to have a shelter that fits your needs. All of our shelters are designed to be used with trekking poles to help you save weight and let you go fast. We utilize the latest innovations in fabric technology in our tents. For example, we use silicone coated polyester in the Lunar Solo and Skyscape Trekker.

We strive to keep our shelters lightweight, yet strong enough to last you through many years of use.

Photo: Amanda Redpath

The 18 hour rule

When the weather prevents you from making forward progress for hours or days at a time. Trust us you'll want the extra space and comfort we design for.

Our designs are guided by the 18-Hour Rule: If you haven't *lost it* after being stuck in a tent for 18 hours--Any additional time after that isn't going to make a significant difference.

We've found this out through personal experience-- a lot of it not so pleasant.

Shelter Materials

The majority of Six Moon Designs shelters use Siliconized Ripstop Nylon (Sil. Nylon) or Siliconized Ripstop Polyester (Sil. Poly) . Both fabrics are a great balance of weight, durability, cost, and water resistance. Shelters made with these materials will require the application of a seam sealer to make them completely waterproof.

Check out our "Ultimate Guide to ultralight tents"

Lunar Solo 26 OZ - 740 G

Redesigned to make simple even more functional.

With the Lunar Solo tent, sacrifice nothing but extra weight – ultralight, sturdy, weather-tight, and comfortable. The unique hexagonal design and steep, sloping sides help deflect high winds and shed snow, keeping you safe from the elements. The spacious 26 sq. ft. living space and extra 8.5 sq. ft. vestibule means there's plenty of room for you AND your gear (or your favorite 4-legged friend).

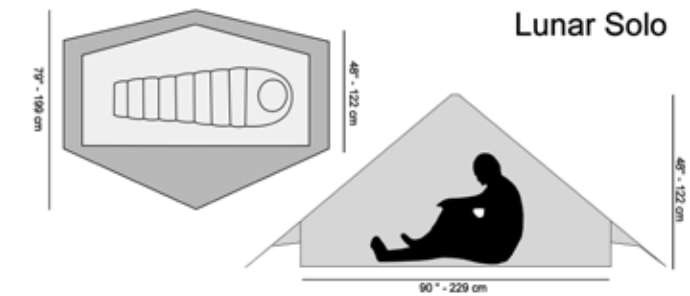

Features:

- Full Vestibule
- Hood vent for better ventilation
- 6" Bathtub Floor
- Floating Canopy and Floor
- Optimized Sleeping Area for Maximum Usable Space
- Single, Center Pole Support
- Rear Space for Internal Gear Storage
- Large Screen Door for Ventilation and Easy Access
- Internal Mesh Pocket
- Easy set up after initial practice pitching
- Now using reflective cord for corner guy outs for easier adjusting and convenient repairs

Specifications:

Skyscape Series Features

- Hybrid Double Wall Design
- Dual Entry
- Vestibules rollback for 300° views and ventilation
- Dual Pole structure is extremely stable in wind and snow
- Bathtub Floor
- Stash Pocket
- The tall ceiling gives plenty of headroom
- Extended floor for tall hikers
- Side entry for easy access
- Easy Setup
- Packs extremely small

Floor Space: 23 ft² - 2.2 m²
 Vestibule Coverage: 16 ft² - 1.4 m²

SkyScape Trekker 28 oz - 790 g

Redesigned to make simple even more functional.

With a floor that stretches over 8 feet long, you'll have plenty of room to stretch out – no matter what your height. Our most versatile 3-season tent. It has two massive side entrances, each with its own 8 sq. ft. vestibule. Both sides can be left open for sweeping 300° views. Or you can open and close the vestibules to find the perfect setup for your comfort and current weather conditions. The hybrid double wall design creates a bug proof mesh interior and keeps that wet canopy at bay. And with an extra long floor, you can get in a nice morning stretch or stow your gear.

Specs:

PACKED SIZE: 15" x 5" 38 cm x 12 cm

Haven Ultralight Tent

So livable, you won't even miss your old, heavy tent

A two person, fully enclosed, double walled shelter. A 4-walled weather protector. Or a bug-free stargazer's dream. The versatility of the Haven makes all of these possible. And don't forget its ultralight!

The Haven Ultralight Tent comes bundled with a clip-in NetTent. Which can be set up independently for bug free sleeping, or clipped into the Haven to create a double walled tent.

Tech Specs

PACKED SIZE: 15" x 5" | 38 cm x 12 cm

FLOOR SPACE: 23 ft² | 2.2 m²

VESTIBULE COVERAGE: 53 ft² | 4.9 m²

The Haven Shelters comes bundled with a Nettent.

Features

- Full 360° protection provides enhanced security compared to a traditional flat tarp.
- High Vent to reduce condensation.
- Zippered Vestibule Closure makes opening and closing the vestibule a breeze.
- Dual Side Entry makes entries and exits easy.
- Optimized Sleeping Area is oriented to maximize usable space, ventilation, and view.
- Pairs Easily with the Haven NetTent giving you an ultralight double-walled tent for two.
- Color Coordinated Attachment Points for quick setup with the Haven NetTent.

UL Groundsheet: 48" x 96" x 5"
121 cm x 244 cm x 13 cm

A true Double-Wall shelter

Trekking Pole Compatible

Haven NetTent 16 oz - 450 g

Protection from bugs – for those nights where you just can't stop looking at the stars.

Designed to be paired with the Haven Tarp, this net tent can easily be pitched on its own. The Haven Tarp acts in harmony with the Haven NetTent to create an ultralight, double-walled two-person tent. On its own, you can enjoy an evening watching day fade into night without constantly swatting away annoying Mosquitoes or hikers.

Specifications:

PACKED SIZE: 12" x 4.5" x 1.5" | 31 x cm x 11 cm x 4 cm

FLOOR SPACE: 27 ft² | 2.5 m²

BATHTUB: 30 D Silicone Coated Nylon

MESH: 20 D No-See-Um

ZIPPER: #3 YKK

Owyhee Shelter 24.6 oz - 689g

The same size as the Haven. But with more elbow room.

We took our Haven design, made it into the ultimate two person tarp. Simply called the Owyhee, this tarp has the benefit of an added No-See-Um skirt perimeter, that eliminates the need to carry a bug net to keep away those pesky mosquitoes.

Every Owyhee includes a detachable 3D bathtub, gear loft, and clothes line.

Features

PACKED SIZE: 12" x 4.5" 31 cm x 11 cm
FLOOR SPACE: 23 ft² 2.2 m²
VESTIBULE COVERAGE: 53 ft² 4.9 m²
CANOPY: 30 D Silicone Coated Polyester

Gatewood Cape 11 OZ - 310G

The super ultralight backpacker's dream – shave ounces by combining your rain gear and tarp into one.

The Gatewood Cape is the ONLY poncho-style Tarp to provide complete 360° protection. Since its introduction in 2006, it has been carried over hundreds of thousands of trail miles. It's provided shelter in everything from high mountain snow-choked ridges to lush forest trails.

Features

- Micro Buckles connect the harness to cape for easy installation and removal.
- Full 360-Degree protection when set up as a shelter or worn as rain gear.
- Full Zippered Entrance makes entering and exiting the shelter a snap.
- Adjustable Vestibule Height allows increased ventilation while maintaining adequate rain protection.
- Side Snaps for shortening the long sides when worn as a cape.
- Floating Canopy allows the canopy to be set to different heights depending upon conditions.
- Integrated Map/Night Stash Pocket with zipper closure to keep stuff contained.
- Pocket also doubles as the stuff sack.
- Center Pole Support significantly improves the ability of the shelter to handle wind and snow loads.

Specs

PACKED SIZE: 10" x 8" x 1.5" 25 x cm x 20 cm x 4 cm
COVERAGE: 35 ft² 3.2 m²

Net Tents

Serenity NetTent

A simple solution to bugs and pests. Period.

Sometimes the best solution is the simplest. The Serenity NetTent provides a simple solution to dealing with insects and mice and other creepy crawlies. Its small footprint means you can set it up any place. It is a great solution for a bug-free night of camping in fair weather or for those sticking to open shelters on the Appalachian Trail.

Shelter Accessories

Tent Poles

If you're a cyclist, paddler or don't carry trekking poles, you may wish to consider using our collapsible poles to support your shelter. Available in both Aluminum and Carbon Fiber, 45" and 49" lengths, and now offered in 3 or 5 sections to suit your packing needs.

Aluminum Poles 45" | 114 cm

Sections	Length	Folded Length	Weight	SKU
3-Section	45" 114 cm	17" - 45 cm	3 oz 85 g	90302
5-Section	45" 114 cm	11" - 28 cm	3.7 oz - 104 g	90307

Carbon Fiber Poles 45" | 114 cm

Sections	Length	Folded Length	Weight	SKU
3-Section	45" 114 cm	17" - 45 cm	1.8 oz 54 g	90300
5-Section	45" 114 cm	11" - 28 cm	2.1 oz - 60 g	90305

Aluminum Poles 49" | 124 cm

Sections	Length	Folded Length	Weight	SKU
3-Section	49" 125 cm	17.5" 45 cm	3.2 oz 90 g	90303
5-Section	49" 125 cm	11" 28 cm	3.7 oz 104 g	90308

Carbon Fiber Poles 49" | 144 cm

Sections	Length	Folded Length	Weight	SKU
3-Section	49" 125 cm	17.5" 45 cm	1.8 oz 51 g	90301
5-Section	49" 125 cm	11" 28 cm	2.3 oz 64 g	90306

Foot Prints

We offer footprints as way to help protect the floor of your shelter from rocks, sticks and other ground debris that can shorten the lifespan of your shelter. Available in both non-printed Tyvek and Polycro, these fabrics have proven to be a favorite among ultralighters.

Tyvek

Tyvek is extremely durable and ideal for hard surfaces and desert environments, where the risk of punctures is a great concern.

Product	Weight	Dimensions	SKU
Tyvek-Small	4.5 oz - 128 g	84" x 36" 213 cm x 91 cm	90200
Tyvek-Large	7 oz - 199 g	84" x 48" 214 cm x 112 cm	90201

Polycro

Polycro is ultra strong and ultralight material more commonly used to help shrink wrap an extra thermal layer in windows. While not as durable as tyvek it is an ideal barrier form ground moisture and suited well for soft ground and forest environments.

Product	Weight	Dimensions	SKU
Polycro-Small	1.2 oz - 23 g	96" x 40" 244 cm x 102 cm	90203
Polycro-Large	1.6 oz - 45 g	96" x 48" 244 cm x 112 cm	90204

6 Piece Stake Set 2.5 OZ - 71 G

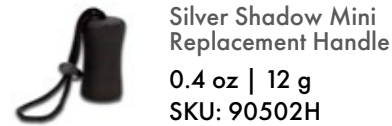

Includes six 7"- 18 cm 7000 series aluminum Y stakes. We've found that the Y stakes have optimal holding power for their weight. There is a pull cord featured on each stake for easy removal when packing up in the morning.

SKU: 90107

Ultraight Umbrellas

One of the most overlooked pieces of gear in the world of ultralight backpacking is a good hiking umbrella. Our Silver Shadow family of hiking umbrellas are some of the lightest and strongest available, and feature UPF 50+ blocking canopies partnered with some ultralight components such as carbon fiber or fiberglass.

Silver Shadow Mini Replacement Handle
0.4 oz | 12 g
SKU: 90502H

Don't forget to grab a hands-free umbrella kit, which easily attaches to any pack for ease of use in the field.

Silver Shadow Carbon 6.8 oz | 193 g

The Silver Shadow Series provides a large reflective surface on top to deflect sunlight and a black underside to absorb wandering rays, allowing you to walk cooler and better protected. Its coating sheds water easily, eliminating the need to wear sweaty rain gear.

WEIGHT: 8.9 oz 252 g
CANOPY: 37" 94 cm & Polyester 210T Silver Reflective
LENGTH: 25" 63.5 cm
RIB DIAMETER: 3 mm Carbon Fiber
COVERAGE: 7.5 ft ² .7 m ²

SKU: 90501

Silver Shadow 8.9 oz | 252 g

With rigid, fiberglass shaft insures that it won't unexpectedly collapse, and its simple construction ensures years of trouble free use. The simple design with minimal parts keeps it light and durable. There's simply fewer things to break or malfunction.

WEIGHT: 8.9 oz 252 g
CANOPY: 37" 94 cm & Polyester 210T Silver Reflective
LENGTH: 25" 63.5 cm
RIB DIAMETER: 3 mm Fiberglass
COVERAGE: 7.5 ft ² .7 m ²

SKU: 90500

Silver Shadow Mini 6.8 oz | 193 g

The Silver Shadow Mini is the collapsible, compact umbrella in our line. Packing to 40% the length of our other umbrellas, it is ideal for travel or when space is paramount.

Now Includes EVA foam Handle

WEIGHT: 8.9 oz 252 g
CANOPY: 37" 94 cm
LENGTH: 25" 63.5 cm
RIB DIAMETER: 3 mm Fiberglass
COVERAGE: 7.5 ft ² .7 m ²

SKU: 90502

Rain Walker SUL 5.5 oz | 156 g

Offering more ventilation and weighing less than most rain gear and often keeps you drier. NOTICE: While we have tested this umbrella in high winds, hail, and other extreme conditions the ultralight components that make up this product require extra care in the field.

WEIGHT: 8.9 oz 252 g
CANOPY: 37" 94 cm
LENGTH: 25" 63.5 cm
RIB DIAMETER: 3 mm Fiberglass
COVERAGE: 7.5 ft ² .7 m ²
