Robust hiking backpack with ventilated mesh back and modular fastening system. The Hike Pack 30 BC is part of the Bushcraft collection from Tatonka. Thanks to its lightweight, ventilated carrying system, it is extremely comfortable to wear, especially during intensive movement. The rucksack is made of robust Cordura, and the modular, Molle-compatible fastening system on the front, sides and on one hip fin allows you to attach additional bags or other equipment. The backpack has a PFC/PFAS-free DWR finish.
