

# ORTLIEB HANDLEBAR-PACK FLEX

## WATERPROOF HANDLEBAR BAG WITH MOUNTING-SET INTERFACE

The Handlebar-Pack Flex is a waterproof luggage roll for bikepacking, which impresses above all with its variable mounting options on the handlebars. The handlebar bag with a volume of 15 L is ideal for carrying a sleeping bag and sleeping mat and can be quickly attached to the handlebar and the QR mounting set (not included) thanks to the adapter plate on the back. Once you have reached your destination, simply click it out of the mounting set to take it with you.

The Handlebar-Pack Flex ensures balanced luggage and load distribution on the bike, especially on rougher terrain. Thanks to the roll closures on both sides, you can easily access the contents at any time. Elastic drawstrings on the outside allow you to stow and attach additional equipment. There are also four hooks for attaching the accessory pack to expand the volume.

The valve in conjunction with the all-round compression straps ensures that the contents fit snugly and the corresponding internal reinforcement of the handlebar bag also helps to provide even more stability. Two bright reflectors provide the necessary safety in the dark. The maximum load of the Handlebar-Pack Flex, which is sustainably manufactured in Germany, is five kilograms.

### OPTIONAL ACCESSORIES:

Reflective logo and reflectors increase visibility

### SPECIFICATIONS:

Material: nylon fabric, PU-coated

Volume: 15 L

Weight: 460 g

Colors: black matt, dark-sand
